Intraday Commentary From Jim Bianco

ISM had its biggest monthly jump since June 2020. Prices didn't move that much, but they still remain well about 50, which means more companies are reporting higher input prices than not.

Most economists think that distortion has to do with tariff pricing. And what the sticky high prices paid is telling you is tariffs still matter. There's no ifs, ands, or buts, manufacturers reported a material and significant jump in their activity in January.

The bond market agrees. One-day tick chart of the 10-year yield the gap higher to 4.28% Is the bond market's reaction to the ISM report.
